

AUDA plans 4,000-hectare drainage-stormwater project; to benefit 10 lakh residents

As a New Year gift, the Ahmedabad Urban Development Authority (AUDA) is moving ahead with its plan to resolve long-standing issues related to drinking water, drainage, and waterlogging. Covering an area of 4,000 hectares, the project aims to benefit around 10 lakh people through the creation of a comprehensive drainage and stormwater line network.
