

Why 13th steel bridge of Bullet Train project in Ahmedabad is distinct?

The Mumbai-Ahmedabad High-Speed Rail (MAHSR) project has achieved another major engineering milestone with the successful completion of a 100-metre-long steel bridge over an underground metro tunnel in Ahmedabad district. This structure is the 13th steel bridge completed in Gujarat out of the total 17 planned in the state, highlighting the rapid progress of the ambitious bullet train corridor.
