

Finding Parking in Ahmedabad Gets Easier as AMC Links 160 AmdaPark Parking Locations to Google Maps

In a move aimed at making parking easier and improving traffic management, the Ahmedabad Municipal Corporation (AMC) has integrated around 160 public parking locations across the city with Google Maps.

The mapped locations include pay-and-park facilities, smart parking sites, multi-level parking buildings and on-street parking spaces. The initiative, launched under the Digital India and Smart City Mission, will help both residents and visitors easily locate parking spots and navigate to them using Google Maps.

With the integration, motorists can find the nearest parking facility, get directions and avoid driving around in search of parking, helping reduce traffic congestion while saving time and fuel.

The facility has also been integrated with AMC's AmdaPark app, which allows users to check parking locations, view parking availability, make advance bookings and pay digitally.

AMC has also opened the AmdaPark platform to private property owners and commercial establishments such as malls, hospitals, multiplexes and hotels. Those offering free parking to the public will continue to be eligible for a 100% property tax exemption on the parking area, as per the corporation's existing policy.
