

21 Food Samples Fail AMC Quality Tests; 18 Found Substandard, 3 Unsafe

The Amdavad Municipal Corporation (AMC) has found 21 food samples collected from eateries, food manufacturers, dairies and street vendors across the city to be either unsafe or substandard during food safety inspections conducted under the Food Safety and Standards Act in July. According to the civic body, 18 samples were found to be substandard, while three were classified as unsafe.

According to the list released by the AMC, the non-conforming samples collected from various zones of the city include garlic paste, mava, fryums, Manchurian, vegetable puff, jeera-flavoured drink, clove, butter, refined cottonseed oil, sweet chutney, juice, mosambi juice, tomato chutney, ghee, cheese and premium malai paneer.

The AMC report states that samples of Kesari Nandan Spice brand turmeric powder and coriander powder collected from Jai Mataji Traders in Juna Madhupura, as well as Dhariwala brand fryums Bachcho Ka Pasta collected from Aman Sales Agency in Amraiwadi, have been declared unsafe.
