

Ahmedabad Adds Over 29,000 PNG Connections Since April

Ahmedabad city has recorded 29,041 new Piped Natural Gas (PNG) connections in the last four and a half months, with the demand for PNG rising amid concerns over LPG availability and the continued expansion of the city's PNG network.

A total of 29,041 new customers have taken PNG connections between April and August so far. The highest number of new connections was recorded in April, when 11,047 customers joined the network. This was followed by 6,455 connections in May, 5,270 in June, 4,724 in July and 1,545 new connections so far in August.

The increase comes at a time when customers have been facing concerns over LPG availability following the Iran war. With the PNG network expanding across Ahmedabad, more households are opting for piped gas as an alternative.
