

AMC Approves New GIS Mapping System for Ahmedabad; 25 Lakh Properties to Get Digital IDs

The Amdavad Municipal Corporation (AMC) is set to implement a new state-of-the-art Geographic Information System (GIS)-based Management Information System (MIS) for the entire city to support better urban planning, infrastructure development and citizen-oriented services.

The civic body had earlier undertaken GIS-based mapping of Ahmedabad in 2014. However, the city has expanded significantly since then, with an increase in population, new areas being included within its limits and major expansion of water, sewerage, underground utility networks and roads. The AMC has therefore identified the need for more accurate and updated geospatial data.
