

Ahmedabad Design Challenge 2026 Launched to Reimagine City's Urban Landscape

The Association of Designers of India (ADI), Ahmedabad Chapter, in collaboration with the Ahmedabad Municipal Corporation (AMC), has launched the Ahmedabad Design Challenge (ADC) 2026, a citywide design competition aimed at reimagining Ahmedabad's urban and cultural landscape ahead of its potential bid to host the 2030 Commonwealth Games.

For the first time, ADC brings together design, architecture, interior design and fine arts to develop creative interventions for the city's gateways, transit points, heritage routes and public spaces.

The competition has three themes: 'Welcoming the World', 'Celebrate Ahmedabadness' and 'Building Community Experiences'. The first focuses on improving key entry points and creating a strong first impression for visitors. The second seeks to highlight Ahmedabad's local identity and cultural character, while the third aims to turn underutilised spaces into vibrant areas for recreation, social interaction and community engagement.
